Summary

Computer Engineering undergraduate skilled in Full Stack Web Development, Java, Data Structures & Algorithms, Object-Oriented Programming, REST APIs, and Data Analysis. Experienced in developing scalable web applications using ReactJS, Node.js, Express.js, MongoDB, Java, and Python with strong problem-solving and logical thinking abilities. Interested in Software Engineering, AI, Data Science, and Backend Development.

Education

Bachelor of Engineering (Computer Engineering)

2023-2027

Bhivrabai Sawant Institute of Technology and Research, Pune

CGPA: **9.45/10**

Skills

- Programming Languages: Java, C, C++, Python, JavaScript
- Frontend: HTML5, CSS3, JavaScript, React.js, TailwindCSS, Responsive Web Design
- Backend: Node.js, Express.js, REST APIs, JWT Authentication
- Database: MongoDB, MySQL, Database Management
- Tools & Platforms: Git, GitHub, Postman, VS Code, PyCharm,
- Relevant Coursework: Data Structures & Algorithms, DBMS, OOP, Computer Networks, Operating Systems
- Data Science & Analytics: NumPy, Pandas, Matplotlib, Seaborn, Data Visualization, Data Analysis, Data Cleaning, Data Preprocessing, Statistical Analysis

Projects

Hostel-Hub – Full Stack Hostel Recommendation System | [GitHub Link](#)

- Built a full-stack hostel recommendation web application for location-based hostel discovery and personalized recommendations.
- Implemented filtering features based on budget, ratings, and area preferences with responsive web design.
- Integrated CRUD operations, RESTful APIs and scalable backend services for efficient hostel data management.
- Integrated JWT-based authentication to secure role-based user access for 500+ accounts
- Tech Stack: HTML5, CSS3, JavaScript, Node.js, Express.js, MongoDB, REST APIs

Agri-ARYA – MERN Stack Smart Agriculture Platform | [GitHub Link](#)

- Developed a MERN stack agriculture platform providing real-time crop price analysis and crop recommendations using weather and soil parameters.
- Implemented API integration and intelligent recommendation logic for crop prediction and farm management.
- Built scalable backend services and responsive frontend interfaces with MongoDB database integration, reduces query response time by 20%.
- Deployed full-stack applications using Render and Netlify

NutriSync-AI – AI-Based Nutrition Recommendation System | [GitHub Link](#)

- Developed an AI-powered nutrition assistant that generates personalized diet recommendations using real-time health parameters.
- Executed intelligent recommendation logic based on heart rate, oxygen levels, and health monitoring data.
- Built a responsive UI and integrated backend services with scalable MongoDB database management.
- Tech Stack: HTML5, CSS3, JavaScript, Node.js, Express.js, MongoDB, REST APIs

Experience

Java and DSA Intern | [Talent Battle Pvt Ltd](#) | July 2025

- Worked on Java programming and Data Structures & Algorithms through hands-on coding practice.
- Applied object-oriented programming concepts including inheritance, polymorphism, and exception handling.
- Improved problem-solving and algorithm optimization skills through intensive DSA training.

Achievements

- 4th Rank in the HackArena 2026, Hackathon conducted by VIIT college Pune
- Participated in 5+ hackathons
- Solved 50+ DSA problems on Leetcode
- Secured 2nd highest CGPA in Semester 5

Certifications

- MERN Stack Web Development Certificate – Road to Code
- Java and Data Structures & Algorithms Internship Certificate – Talent Battle Pvt Ltd
- Data Analytics Training (Ongoing) – Code With Harry
